

365 Data Science SQL Basics – Topic 3.2: Inserting Data Into New Tables

Exhaustive Notes on Subquery Insertion using INSERT INTO ... SELECT ...

1. Inserting Data via SELECT Subqueries

Rows can be copied directly from existing tables into a new table using `INSERT INTO ... SELECT ...`.

```
CREATE TABLE department_managers (  
    emp_no INT PRIMARY KEY,  
    dept_no VARCHAR(10)  
);  
  
INSERT INTO department_managers (emp_no, dept_no)  
SELECT emp_no, dept_no FROM dept_manager;
```

2. Topic 3.2 Viva Q&A

1. Q: How do you copy data from one table to another in SQL? A: Use `INSERT INTO target\_table (cols) SELECT cols FROM source\_table`.
