

365 Data Science SQL Basics – Topic 5.1: The DELETE Statement

Exhaustive Notes on Removing Specific Rows Conditionally with DELETE FROM

1. The DELETE Statement

The `DELETE` statement removes specific record rows conditionally from tables.

```
DELETE FROM employees  
WHERE emp_no = 10001;
```

2. Topic 5.1 Viva Q&A

1. Q: What happens if you run DELETE FROM table without WHERE? A: Deletes all rows in the table row-by-row while logging the operations.
