

365 Data Science SQL Basics – Topic 3.1: The INSERT Statement

Exhaustive Notes on Inserting Single and Multiple Rows INTO Tables

1. The INSERT INTO Syntax

The `INSERT INTO` statement adds new record rows into database tables.

```
INSERT INTO employees (emp_no, birth_date, first_name, last_name, gender, hire_date)
VALUES (10001, '1985-05-14', 'Asha', 'Sharma', 'F', '2018-09-01');
```

2. Topic 3.1 Viva Q&A

1. Q: What happens if column names are omitted in an INSERT statement? A: Values must be provided for ALL table columns in exact physical schema order!
