

365 Data Science SQL Basics – Topic 5.2: DROP vs TRUNCATE vs DELETE

Exhaustive Notes on Table Cleanup Operations, DDL vs DML Differences & Auto-Increment Behavior

1. DROP vs TRUNCATE vs DELETE Comparison Matrix

• `DELETE` (DML): Removes rows conditionally; can be rolled back; slow.` • `TRUNCATE` (DDL): Instantly removes all rows; resets auto-increment; keeps table structure.` • `DROP` (DDL): Deletes table structure and all data permanently.`

Table Data Removal Comparison: DROP vs TRUNCATE vs DELETE
